## OBJECTIVE

Seeking MS degree in Computer Science and contribute to the responsible development of Artificial General Intelligence and build advanced software systems that push technological boundaries.

## EDUCATION

|                                                                                                                                                                                                                           |                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Marathwada Mitra Mandals College of Engineering, Pune, India                                                                                                                                                              | Aug 2020 - May 2024 |
| B.E in Computer Science                                                                                                                                                                                                   | CGPA: 8.7/10.0      |

## WORK EXPERIENCE

**Ardent Privacy** | *Software Engineer* Mar 2024 - Present

- Built a secure, scalable backend for the company's flagship Data Discovery product, enabling enterprises to scan, classify, and manage sensitive data while supporting compliance logic and exposing robust APIs for the frontend.
- Designed and implemented modular RESTful APIs using Node.js and Express.js, optimized data with CockroachDB using advanced SQL/PostgreSQL techniques, and ensured backend services aligned with enterprise-grade performance benchmarks.
- Delivered a resilient backend architecture that improved API response times by 30%, and scaled seamlessly to handle millions of data records with high accuracy.
- Worked on DevOps activities such as building CI/CD pipelines and managing deployment processes on the client side to ensure smooth and reliable releases.

**MandrakeTech, Pune** | *Software Development Intern* Aug 2023 - Nov 2023

- Tasked with learning and applying various skills related to software development and industry practices.
- Acquired proficiency in Rust programming, mastered client-server communication, API usage, OAuth workflow, ER diagram comprehension, Git version control, and Docker container deployment.
- Created a Mock Gmail API using Rust, integrated Gmail API, implemented OAuth for security, and enabled client-server communication for user interaction.
- Acquired interpretation skills and gained practical insights into industry applications.

**BlueBinaries Engineering and Solutions Pvt. Ltd., Pune** | *Software Development Intern* Feb 2023 – May 2023

- Many vehicle drivers faced confusion due to dashboard indications in their vehicles, requiring a solution to these problems.
- Developed an application using Flutter to create a platform-independent tool for drivers to interpret dashboard indications.
- Utilized Firebase as the database to help drivers interpret vehicle dashboard indications and find solutions to problems.
- Reduced drivers' average navigation time from 55 seconds to 25 seconds by helping them diagnose and resolve maintenance issues more efficiently, while deepening my understanding of industry-standard development tools and practices.

## FINAL YEAR PROJECT

**Smart Workout Companion: for Precise Posture Monitoring and Yoga Pose Refinement** Sep 2023 - Mar 2024

- Developed an integrated application for real-time posture monitoring and guidance during exercises, yoga, and meditation.
- Annotated and augmented video data, integrated pose detection into a Flask web app, and implemented real-time feedback mechanisms.
- Utilized computer vision libraries, MediaPipe Pose model, and Flask integration for development, testing, and deployment.
- Provided users with accurate real-time feedback, enhancing engagement and convenience in accessing exercise guidance.

## RESEARCH PAPER

Smart Workout Companion: Leveraging Deep Learning for Precise Posture Monitoring and Yoga Pose Refinement (May 2024) - [Link](#)

## **TECHNICAL SKILLS**

---

Programming Languages: C++, Javascript, Python, Rust

Miscellaneous: Node.js, Express.js, OpenCV, Mediapipe, Flask, Linux, MySQL, MariaDB, CockroachDB, MongoDB, Postman, Docker, Deployment, HTML, CSS, Jenkins, Git, Cloud Computing, Jira, BitBucket, MS Office

## **ACHIEVEMENTS**

---

- Presented research paper titled “PoseCraft Fitness Navigator” at International Conference on Recent Trends and Advancements in Computer Technologies (ICRTAC-2024) - [Link](#)
- OOP Hackathon Competition Runner-Up– Issued by MMCOE (1 Dec 2021) - [Link](#)

## **CERTIFICATIONS**

---

- AWS Academy Cloud Foundations - Issued by Amazon Web Services Training and Certification - [Link](#)
- IBM Cybersecurity Fundamentals - Issued by IBM SkillsBuild - [Link](#)
- Celonis Process Mining Foundations - Issued by Celonis Academy - [Link](#)
- AWS Well-Architected Certification - Issued by AWS Training and Certification - [Link](#)
- Spoken Tutorial Project – Issued by Indian Institute of Technology Bombay - [Link](#)

## **EXTRACURRICULAR & CO-CURRICULAR ACTIVITIES**

---

- Core Committee Member – Software Development, Google Developer Student Club, MMCOE
- Software Development Team Member at TEAM CODE, MMCOE
- Technical Head at ACES, MMCOE
- Student Member at ISACA
- Member at Rotaract Club of Pune City Fortune
- Sergeant at Bhonsala Military School - Summer Military Training Course
